

# Everett Jensen

I had polio in 1952. I was in the hospital for 11 months in an iron lung.

I have been on a breathing machine for the last 10 years. This winter, I went to a handicap van and electric wheelchair.

Betty & I married in 1958 and have 3 children and 6 grandchildren.

I walked for 40 years after they told me I would never walk again. We had our own business of feed and implement for 40 years, retiring in 1994.

That is when we moved to independent living where all homes are handicap accessible and have a manager and maintenance person who takes care of everything. I also have a buddy system, coffee, potlucks, celebrate birthdays and anniversaries, and Bible studies. Also available is a workshop, craft room, commons area a guest room. One monthly fee includes everything except a phone. No worries though, it's secured.

This is an extended family the way the Lord meant it to be; never alone, get to know each others' children. People can't wait for our grandkids to come.
